SUMMARY

Ms. Appleton is an expert in numerous areas of ASTM, ASME, and MSS materials specifications and product standards, and Quality System Programs for materials manufacturers and suppliers in process, pressure piping, and pressure vessel materials and piping components, especially in austenitic stainless and high-alloy materials. In particular she has extensive experience with the supply of materials in the commercial nuclear power industry under the requirements of ASME Section III NCA-3800/NCA-4000/HAB-3800/HAB-4000, ASME NQA-1, and the US Nuclear Regulatory Commission Regulations Title 10, Code of Federal Regulations, Appendix B to Part 50 - Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants and Part 21--Reporting Of Defects And Noncompliance. Most recently, she has participated in the development and maintenance of the ASME QPS Quality Program for Suppliers General Industry Standard 2021. For more than the past 30 years, she has participated and achieved leadership positions in the consensus committees at various standards development organizations with jurisdiction over these specifications and standards. Ms. Appleton has been elevated to the grade of Fellow at both ASTM and ASME. Her industry SDO experience is alloyed with over 40 years of daily hands-on experience in quality management and production management of a pipe fitting manufacturing facility.

Powers, Labrador, Appleton

(美国机械工程师学会 (ASME))

Important Role of ASME Standards in US Industry Development

Powers, Labrador, Appleton

(American Society of Mechanical Engineers (ASME))

Lauren Powers 简介:

Lauren Powers is a Project Engineering Advisor in ASME's Conformity Assessment Department. She is the Product Manager for the N-Type Certificates, Quality System Certificates for nuclear material owners, and the NQA-1 Program Certification. She has previously served as a staff secretary for ASME's BPV XI Standards Committee, OM Code Committee, QME-1 Standards Committee, and the Board on Nuclear Codes & Standards. Lauren holds a Bachelor of Science in Chemical Engineering from Villanova University and a Master's in Public Administration from Seton Hall University.

JON G. LABRADOR 简介:

Managing Director, Conformity Assessment

Oversight of the development and maintenance of ASME Conformity Assessment's Product Certification, Accreditation and Personnel Certification programs as well as Standards & Certification and Conformity Assessment's Process Management Department responsible for the maintenance and development of S&C Electronic Tools.

ANNEMARIE APPLETON 简介:

Ms. Annemarie Appleton is the President of Alloy Stainless Products Company Inc., a division of Knickerbocker Machine Shop Inc. with locations in Totowa and Fairfield, NJ, USA. Alloy Stainless Products Company has been manufacturing the ASP brand of austenitic, duplex, nickel, and other alloy pipe fittings and specialty components for a world market including chemical processing, paper production, shipbuilding, and power plants, including nuclear facilities, for 75 years.

Ms. Appleton joined ASP in 1981 as inside sales associate and has held several positions including quality control administrator, Nuclear Lead auditor, QC Manager and VP Quality and VP/Manufacturing prior to becoming President and assuming executive management responsibility for the entire company. Prior to joining ASP/KMS in 1981, Ms. Appleton worked at Bard Parker, a division of Becton Dickinson Company, in Lincoln Park, NJ, as contract sales leader, and she also served on the Board of Directors of Greater Community Bank, a publicly held company, for 17 years. She has 35 years of nuclear industry experience.

Ms. Appleton has been actively involved in the ASME Code and Standards, ASTM, and MSS committee and

other industry standards development organizations since 1991. She participates in ASME Boiler and Pressure Vessel Committees II (Materials) and III (Rules for Construction of Nuclear Facility Components. From 2002 to 2012, Ms. Appleton served on the Boards of Directors of MSS - Manufacturer's Standardization Society of the Valve and Fittings Industry, in addition to work on the technical committees. Currently, Ms. Appleton is serving as the chairperson of Subcommittee A01.14 Methods of Corrosion Testing at ASTM Committee A01 on Steel, Stainless Steel, and Related Alloys. She is also the Chairperson of Subgroup Ferrous Specifications of BPV Committee II (Materials).

Ms. Appleton is an expert in numerous areas of ASTM, ASME, and MSS materials specifications and product standards, and Quality System Programs for materials manufacturers and suppliers in process, pressure piping, and pressure vessel materials and piping components, especially in austenitic stainless and high-alloy materials. In particular she has extensive experience with the supply of materials in the commercial nuclear power industry under the requirements of ASME NCA-3800, ASME NQA-1, and the US Nuclear Regulatory Commission Regulations Title 10, Code of Federal Regulations, Appendix B to Part 50 - Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants and Part 21--Reporting of Defects And Noncompliance. For the past 25 years, she has participated and achieved leadership positions in the consensus committees at various standards development organizations with jurisdiction over these specifications and standards.

In 2010, she was awarded the ASME Codes & Standard Certificate of Acclamation for her outstanding service to ASME and the Nuclear Industry in the re-write of NCA 3800 Metallic Material Organization's Quality System Program, the 1992 Edition 1994 Addenda.

Pat A. Picariell

(American Society for Testing Materials (ASTM))

Pat A. Picariello 简介:

Pat serves as Director, Developmental Operations for ASTM International, one of the largest voluntary standards development organizations in the world. In his role, he leads a team that coordinates the standardization activities of over 30 ASTM Technical Committees covering a diverse portfolio of global industry sectors including steel, forensic engineering, security systems and equipment, automated guided vehicles, roofing, & cement/concrete.

Pat has worked with a broad cross section of industries to help them come together within ASTM to facilitate their standardization objectives. Among the varied committees Pat has organized are activities in asset management, unmanned systems (air, maritime,

SUBJECT: INVITATION TO PARTICIPATE IN THE NUCLEAR REGULATORY COMMISSION
WORKSHOP ON VENDOR OVERSIGHT

Dear Ms. Appleton:

Consistent with our previous communication, we would like to formally thank you for volunteering to be a speaker for the session on "American Society of Mechanical Engineers (ASME) Material Upgrade (NCA 3855.5) v/s Commercial Grade Dedication," during the Nuclear Regulatory Commission (NRC) Workshop on Vendor Oversight, sponsored by the Office of New Reactors. The workshop will be held Thursday, June 12, 2014, at the Portland Marriott Downtown Waterfront, 1401 SW Naito Parkway, Portland, OR 97201, Telephone: 503-226-7600. Further information on the workshop can be found on the NRC workshop on Vendor Oversight website at:

<http://www.nrc.gov/reactors/new-reactors/oversight/quality-assurance/vendor-oversight.html>

We appreciate your willingness to develop a 45-minute presentation on ASME Material Upgrade (NCA 3855.5) v/s Commercial Grade Dedication. The time allocated for this session will be shared between you and Mr. Douglas Vickery, representative and speaker for Dubose National Energy Services Inc. Please contact Raju Patel at 301-415-3511 or raju.patel@nrc.gov regarding further information on this subject. We request that your presentation materials be submitted to the NRC for their inclusion on the workshop website no later than May 2, 2014.

Sincerely,

Introduction & Background.

Discussion of differences and similarities between the two systems for the supply of metallic materials.

There are numerous areas where the two systems actually overlap, and others where they seem to diverge, but it is important to really dissect the terminology, to find that there is more similarity under the surface.

Wear and Corrosion of Metals and Alloys

ASM International Offers One-Day Course;

“Wear and Corrosion of Metals and Alloys”

The ASM International is offering a one-day course entitled, “Wear and Corrosion of Metals and Alloys”. It will be given on November 5, 2005 in ~~Orange County Convention Center, Orlando, Florida~~. There is ample free parking available on campus. It will begin at 8:00AM sharp and continue until 1:00PM.

The cost of the course is \$145, with a ten percent discount for advance payment. The price for retirees, unemployed members, and full-time students is \$75, with an additional five percent discount for advance payment.

Interested individuals can register by mailing a check to ASM International, 21 Burnside Drive, Short Hills, NJ 07078.

The course is a distillation of the eleven-lecture course given by Dr. Buck Buchanan at ASM Headquarters in Metals Park. The content of the one-day course is as follows;

Friday, November 04, 2005 America Online: ASPaba

Lecture 1; 8:05AM-9:00AMAM;

Introduction; practical applications of applications requiring control of wear and corrosion; turbines, pumps, valves, shafts, expanders, bearings, gears, structural components.

Lecture 2; 9:05AM-10:00AM;

Mechanisms of wear and corrosion; abrasive wear, adhesive wear (galling), cavitation, erosion, fretting, oxidation, sulfidation, aqueous corrosion, galvanic corrosion, crevice corrosion, intergranular corrosion, stress corrosion.

Lecture 3; 10:05AM-11:00AM

Techniques to reduce wear and corrosion; base alloy selection, surface alloying, overlays.

Lecture 4; 11:05AM-12:00PM

Base alloy selection; composition, hardness, heat treatment, metallurgical considerations, wear and corrosion-resistant materials.

Lecture 5; 12:05PM-1:00PM;

Surface alloying; diffusion coatings, case hardening techniques and considerations, spray coatings, vapor coatings, and weld overlays.
